

## CERTIFICATION

### **Description of the FABER-CASTELL Multimark permanent and a Certification of the Safety.**

The plastic materials of the barrel, cap, wick and nib are polypropylene, polyester and polyacetal (POM). The inks are alcohol-based (permanent).

The Multimark pens are consumer goods and not dangerous products or chemicals. Therefore a Safety Data Sheet or a Product Information Sheet isn't necessary under the existing regulations of the EU.

Faber-Castell takes heed of all laws and regulations during the production of products and for products.

The Multimark inks (black, blue, red, green) show a good lightfastness and a good adhesive force on many surfaces. The product is recommended for smooth surfaces with an stability against alcohol-based inks.
